# Power Up Your Future!

## Power Up Your Future with Duke Energy Technology Scholarships.

The Applied Engineering and Technologies Division (AET) at Wake Tech has been awarded a limited amount of additional money to continue the Duke Energy Opportunity Grant (DEOG) to provide scholarships for new students in the following programs:

- Air Conditioning, Heating, and Refrigeration
- Civil Engineering Technology
- Construction Management Technology
- Electrical Systems Technology
- Electronics Engineering Technology
- Facilities Maintenance Technology
- Geomatics Technology
- Mechanical Engineering Technology
- Plumbing Technology
- Welding Technology

## Who Can Apply for a Scholarship?

All new part-time or full-time students in the above programs can apply for these technology scholarships, with priority given to women and underrepresented groups. Students may receive up to \$500 for the first semester -- and up to another \$250 for the second semester, if students remain in good academic standing and continue in an approved program.

## Are There Other Forms of Assistance?

The DEOG provides Hardship Assistance for students facing expenses which could prevent them from continuing their education. This grant also offers Certificate Reimbursement for industry standard certifications paid for by the student. All currently enrolled AET students may apply for either of these awards.

## Duke Energy's Mission.

Duke Energy wants to make sure students have the opportunity to begin an educational pathway in an energy sector related program — and remain on that chosen pathway.

## How To Apply.

Applications for the Duke Energy technology scholarships can be found using the DEOG banner at [aet.waketech.edu](http://aet.waketech.edu)

Summer applications will be accepted for Hardship Assistance, and Fall '21 applications are due by June 30, 2021. See application for details. So, complete your application today or ask your instructor or advisor for more information.
