SAB 110 OR MHA 140	Introduction to Addiction & Recovery Introduction to Mental Health	None.	3	0	3

Students are strongly encouraged to meet with their faculty advisors before registering for classes each semester to receive advice on course options, scheduling, and transfer opportunities. Students seeking to transfer to a four-year program upon graduation should consider taking additional general education courses.

All program courses must be passed with a grade of "C" or higher.

\* Students should choose and take courses from one subject area only. Students wishing to study more than one subject area should discuss these options with their faculty advisor.

\*\*Students who have no previous experience or who do not currently work in a human-services position should follow the process for applying to complete WBL 112 and WBL 115. Students who have six months or more of human-services work experience may apply to receive field experience credit for your prior work experience. Students should contact the department clinical coordinator the semester prior to completing the field experience requirement for details.
