

Applied Engineering & Technologies Division

Technical Standards for Mechanical Engineering Technology

A student wishing to enroll in the Mechanical Engineering Technology curriculum must meet the following standards:

They must:

- Have sufficient visual capacity to read prints, schematics, documents, charts and information on computer monitors
- Be able to communicate with co-workers
- Be able to wear hard hats, safety glasses, steel toe shoes, and other safety related equipment as required by industry

Due to the diversity of jobs in this area there may be additional requirements mandated by an individual company in the capability of the graduate, but these will not necessarily be consistent with the profession as a whole.
