Technical Support

Technical Support Degree – A25590TS

-Day and Evening

The Information Technology Technical Support curriculum is designed to prepare graduates for employment with organizations that use computers to process, manage, and communicate information. This is a flexible program, designed to meet community information system's needs.

Course work includes computer systems terminology and operations, logic, operating systems, database, data communications/networking, and related business topics. Studies will provide experience for students to implement, support, and customize industry-standard information systems.

Graduates should qualify for a wide variety of computer-related, entry-level positions that provide opportunities for advancement with increasing experience and ongoing training. Duties may include systems maintenance and troubleshooting, support and training, and Security related help desk and support responsibilities.

IT Foundations Certificate - C25590F

-Day, Evening, and Online

This certificate is designed to give individuals an all-around orientation to computer technologies. It is a recommended starting place for students who know they like computer technology, but are not sure what specific field of computers might be right to follow for their career. The courses introduce students to security, operating systems, programming, databases and other career options that involve computer technology. The courses also can prepare students for a variety of industry certifications.

IT Help Desk Technician Certificate - C25590HD

-Day and Evening

This certificate provides students with the knowledge and practical skills necessary to support users of computing technologies. The course work will help students develop the ability to work in helpdesk and technical support positions.

Cybersecurity Support Certificate – C25590CS

-Day and Evening

This certificate provides students with the knowledge and practical skills necessary to support cyber security technologies. The course work will help students develop the ability to work in a security operations center support position.

Hardware Support and Repair Certificate – C25590HW

-Day and Evening

This certificate is designed for individuals interested in acquiring advanced technical skills and knowledge to maintain and repair personal computers. Students gain skills in buying parts, upgrading, building, and configuring personal computers. Major hands-on topics include documentation, troubleshooting techniques, PC architectures, disk drives and peripheral cards, memory management, and communications devices.

This certificate is designed to prepare the student for A+certification. A program prerequisite if CTI-120 is required.

Networking Support Certificate - C25590NS

- Day and Evening

FIRST SEMESTER

This certificate provides students with the knowledge and practical skills necessary to support users of networking technologies. The course work will help students develop the ability to work in a networking support position.
